

Professional Summary

Results-oriented AI/ML Consultant with expertise in **Generative AI**, **LLMs**, **Conversational AI**, and **DevOps** integration. Proven track record in developing scalable AI solutions, designing **RAG pipelines**, and deploying chatbots using tools like **LangChain** and **Streamlit**. Skilled in integrating **vector databases**, **Kubernetes**, and **CI/CD** workflows. Passionate about advancing AI adoption through innovative projects, technical leadership, and mentoring. Committed to fostering **collaborative learning** by delivering hands-on projects and real-world case studies in Computer Science.

Education

Master of Computer Application in Artificial Intelligence

Manipal University Jaipur, Remote, India

Aug'24 - Present

Bachelor of Science Information Technology

University of Mumbai, India

CGPI 9.22/10.0

June'18-May'21

Skills

- **Programming:** Python, React.js, FastAPI, Linux
- **AI & ML Expertise:** NLP, Large Language Model (LLMs), Retrieval Augment Generation (RAG), Chatbots, GenAI, Huggingface, Duckling
- **Frameworks & Tools:** Langchain, Streamlit, Ollama, OpenAI, Rasa, LM Studio, Tensorflow, PyTorch
- **Database:** ChromaDB, Milvus, Qdrant, MongoDB, SQL, Postgres
- **DevOps & Cloud:** Docker, Kubernetes, Helm, CI/CD (Github Actions), AWS(EC2, S3, EKS, Route 53, Cloudfront)
- **Soft skills:** Leadership, Public Speaking, Community-building, Mentoring, Cross-Team collaboration
- **Certifications:** NLP Specialization (Coursera), Intro to ML(Udacity)

Industry Experience

AI/ML Consultant - Contractor | Ruffalo Noel Levitz | Remote

Oct'24-Present

- **Spearheaded** RAG-based LLM-powered Conversational AI for US universities, achieving an 85% boost in query accuracy by synthesizing website content into structured responses.
- **Developed and Automated** CI/CD pipelines for Dockerized Python microservices deployed via AWS ECR and EKS.
- **Enhanced** frontend usability by integrating dynamic Vue.js components like inactivity handling and chatbot visibility toggles.
- **Coordinated** with Delivery teams, CTO, and Product Owners to Extract business logic, translate into bot flow diagrams using Miro, and Review implementation steps.
- **Leadership and Collaboration:** Mentored peers, led cross-functional initiatives, and drove AI innovation while ensuring seamless feature integration and best practices.

Senior Bot Developer | ChatOwl.Inc | Remote & Bhubaneshwar, India

May'23-Nov'24

- **Team Leadership and Agile Delivery:** Led and coached a cross-functional team of onshore and offshore developers, implementing Scrum and Agile practices to ensure efficient project delivery and continuous improvement.
- **Mental Health Chatbot Development:** Engineered and deployed NLP and LLM-powered chatbots for mental health support, achieving **98% accuracy** in **suicide** detection and **86% in identifying anxiety** and **depression symptoms**.
- **Cross-Team Collaboration and Stakeholder Engagement:** Collaborated with clinical, web, and iOS teams to deliver a seamless, gamified chat experience while working closely with stakeholders to design user-centric workflows in Miro and ensure smooth implementation.

AI/ML Engineer | Hoory | Remote

Nov'21-May'23

- **Game Betting Assistant Development:** Partnered with **SoftConstruct** to build an NLP-powered betting assistant/chatbot using **NER**, **Fuzzy Matching**, **Bag-of-Words**, and **Swarm API** for real-time game data retrieval.
- **Multilingual Expansion:** Enhanced user engagement by **40%** through multilingual support, expanding reach to **Armenian and Iranian audiences**.
- **Cross-Functional Collaboration and Networking:** Worked closely with DevOps, project managers, and stakeholders to ensure efficient delivery, leading to international collaborations through the ITC Maratha Startup Conference in Mumbai, India.

Junior Chatbot Dev | Dolphinchat | Remote

Jul'21-Nov'21

- **Advanced NLP for Chatbots:** Developed chatbots using **DIET Classifier**, **Dialogflow** and NLP techniques like **NER** with **Duckling**, **SpaCy**, **Bert** and **Regex** for accurate intent recognition and entity extraction.
- **Agile Project Delivery:** Collaborated closely with project managers to accelerate delivery timelines while consistently meeting client expectations.

- **Multi-Channel Integration:** Integrated chatbots with messaging platforms like WhatsApp, Facebook, and Instagram, expanding audience reach in the post-COVID digital landscape.

Conversational AI Dev Intern | NeuralSpace | Remote

Dec'20 – June'21

- **Multi-Domain Chatbot Development:** Gained hands-on experience building and deploying **Dialogflow and NLP based** chatbots for diverse clients, including restaurants and automobile businesses, delivering tailored conversational experiences.
- **Android Integration with Voice and API Support:** Developed chatbots for Android applications, integrating Spotify API for music control, using Google's TTS and STT and voice wake functionality using Picovoice's Porcupine.
- **End-to-End Product Delivery:** Collaborated with the CTO on product delivery, Azure-based deployment, and advanced programming practices to ensure seamless project execution.

Key Projects

- **Multimodal RAG:** Build a **Opensource based Multimodal RAG** application using **MongoDB Atlas vector search**, where images, text and figures are embedded into vector using **Llava** and **Gemma3** models on local machine. Please feel free to checkout working on [Github](#)
- **Vacationer:** Recently launched a website **vacationer.dishantg.com** which helps users to find Holidays and Long weekends all over the year regardless of Country and for **Free!** Since going through calendar is quite an headache, this website makes it easier for everybody to find Holidays and plan their trips.
- **Mental Therapy Bot (ChatOwl):** Achieved **98% accuracy** in symptom detection and **100% suicide detection** through advanced **LLM integrations**, NLP techniques such as **NER, Regex, Fuzzy matching**, which significantly enhanced user engagement.
- **GenAI for Agriculture:** Developed a **conversational AI Chatbot** solution using RAG pipelines with **farmer handbooks** and **Open Weather API** to provide actionable insights.
 - Enabled users to query farming and sustainability information.
 - Integrated a feature to analyse fertilizer images, advising on suitability for specific crops. [Github](#)
- **Automobile Voice assistant:** Engineered and orchestrated a voice-enabled automobile assistant app using **Dialogflow, STT/TTS**, and **Google Maps**; automated wake-word detection with Picovoice, enhancing hands-free navigation and interaction.

Speaking Engagements & Workshops

- **MongoDB Meetup:** Presented a Tech talk on building **Multimodal RAG** using MongoDB Vector store.
- **MumPy Meetup:** Presented a Tutorial on building a **AI-Powered CLI** tool in python.
- **ANTS 2024:** Presented a Tutorial Paper on "**GenAI 101**" at **IIT Guwahati** (2024).
- **GDG Tech Winter:** Presented "**Build with AI**" for Farmers using Gemini LLM to 100+ student developers (2024).
- **NextGen Farming:** Keynote Speaker on "**GenAI for Farming and Agriculture**" at Acropolis Institute Indore (2024)
- **CNCF Community Talk:** Workshop on "**AI-Powered Kubernetes Management with Llama 3.1**" (2024)
- **GitHub Community:** Presented a 30min Talk on **CI actions** for Automated Python code reviews (2024)
- **NCAA IET'24:** Pre-talk on "Introduction to LLM and RAG" (2024).
- **IEEE Quater Tech Table:** Delivered a mentorship session on **LLMs and RAG** (2023).
- Find more at <https://dishantg.com>

Community Engagements

- Young Professional Member for IEEE Region 10 India
- **Hobby DevRel:** Published [blogs](#) and [YouTube](#) tutorials, on LLMs and chatbot development.
- Discord Channel Community Manager | Droid City(Personal YT)
- Discord Channel Manager | Rasa
- Winner of SnapKit Developer Challenge 2.0 | Community MVP
- Winner of SnapKit Developer Challenge 1.0 | Best use of Dynamic Lens
